

# CAPABILITY STATEMENT

UEI: SWPHFL5DHFU3 | CAGE: 18Z31

## COMPANY OVERVIEW

Axis Solutions delivers AWS GovCloud architecture and federal compliance implementations for unclassified government workloads. We specialize in FedRAMP authorization support, NIST 800-53/800-171 compliance, and secure cloud migrations for civilian agencies and defense contractors. Our remote-first delivery model and compliance-first approach accelerates time-to-ATO while reducing facility security overhead.

## CORE COMPETENCIES

### AWS & AWS GovCloud Architecture

Multi-account landing zones, network segmentation, and Infrastructure as Code (Terraform, CloudFormation) for IL4/IL5 environments. Design and implementation of secure VPC architectures, Transit Gateway connectivity, and centralized logging infrastructure. Expertise in GovCloud service constraints and compliance-aligned network topologies.

### FedRAMP & NIST Compliance Implementation

Control implementation, SSP documentation, POA&M development, and ATO preparation for Moderate and High impact systems. Automated compliance validation using AWS Config rules and Security Hub standards. Support for continuous monitoring and evidence generation throughout the authorization lifecycle.

### Cloud Migration & Modernization

Lift-and-shift and refactoring migrations from on-premises or commercial cloud to AWS GovCloud with minimal downtime. Application assessment, dependency mapping, and phased migration strategies to minimize operational disruption. Post-migration optimization for cost, performance, and security posture.

### DevSecOps & Continuous Compliance

CI/CD pipeline design with integrated security scanning, automated compliance validation (Config, Security Hub), and continuous monitoring. Implementation of shift-left security practices, container scanning, and infrastructure testing. Integration with existing change management and approval workflows.

### AI/ML Platforms & Generative AI

Amazon Bedrock foundation model integration and agentic AI development for regulated environments. Retrieval-Augmented Generation (RAG) with vector databases and semantic search. AI agent orchestration and SageMaker model training with MLOps automation. Responsible AI guardrails and secure enterprise integration

## DIFFERENTIATORS

- ✓ **Unclassified, Remote Delivery:** All services for CUI and unclassified workloads, eliminating SCIF and facility clearance requirements
- ✓ **Compliance-First Design:** Every architecture decision prioritizes FedRAMP, NIST, and DoD SRG alignment from initial design
- ✓ **Automation-Accelerated Delivery:** IaC and reference architectures reduce deployment time by 30-40% versus manual configuration
- ✓ **GovCloud Subject Matter Expertise:** Deep understanding of GovCloud service availability, networking constraints, and compliance nuances

## NAICS CODES

- 541512** - Computer Systems Design Services (Primary)
- 541519** - Other Computer Related Services
- 541690** - Other Scientific and Technical Consulting Services

## PAST PERFORMANCE

Available upon request for completed engagements

## CERTIFICATIONS & QUALIFICATIONS

AWS Certified Solutions Architect – Associate  
AWS Certified Machine Learning – Specialty  
AWS Certified Machine Learning Engineer – Associate  
CompTIA Security+

Active TS/SCI clearance with CI Polygraph (held by principal, not available for company cleared work)

## SOCIOECONOMIC CLASSIFICATIONS

Small Business
